
2. ZADARSKI LINGVISTIČKI FORUM

Metodologija istraživanja i pisanje znanstvenih radova u lingvistici

23. travnja 2015, Zadar, Hrvatska

PRIJAVE ZA SLUŠAČE JOŠ SU OTVORENE

Prijave za izlaganja na Zadarskom lingvističkom forumu zatvorene su. Srdačno vas pozivamo da se prijavite kao slušači.

Zadarski lingvistički forum namijenjen je doktorandima i poslijedoktorandima lingvistike i ostalih srodnih studija (kroatistika, anglistika, germanistika, talijanistika itd.) te svima onima koji se u svojim istraživanjima bave jezikom. Također, kao slušači dobrodošli su i studenti diplomskih studija.

Pozvana predavanja održat će prof. dr. **Kees de Bot** sa Sveučilišta u Groningenu (Nizozemska) i doc. dr. **Krešimir Šojat** sa Filozofskog fakulteta Sveučilišta u Zagrebu. Prof. dr. sc. **Ida Raffaelli** sa Filozofskog fakulteta Sveučilišta u Zagrebu održat će pozvano predavanje i radionicu.

Kees de Bot: *The methodology of language attrition research*

Though it could be argued that language acquisition and language attrition, defined as the loss of language skills in individuals over time, are governed by the same principles, there are significant differences in terms of research methodology. An obvious one is that repeated testing over a short period of time may actually lead to acquisition and wariness raising. There is also the risk of selective mortality: people who are still fluent in the attriting language are more likely to be willing to participate than those who feel they lost most of it. One approach that has been shown to be effective is the savings method in which residual knowledge can be activated through relearning. In addition, several neuro-imaging techniques may be applicable in research on attrition.

Krešimir Šojat: *Processing Croatian Morphology – Derivational Lexicon*

This talk deals with methods and principles applied in the building of CroDeriV. CroDeriV is a computational lexicon that contains data on the morphological structure and derivational relatedness of Croatian vocabulary. The primary motivation for building this resource is to obtain a complete morphological analysis of the Croatian vocabulary in terms of morpheme structure and derivational families. The secondary motivation for building this resource is to use data structured in this way for further research of derivational and aspectual phenomena, verb valency, semantic structure of the lexicon, semantic relations etc. In the first part of the talk derivational processes in Croatian, a Slavic language with very rich inflectional and derivational morphology, are described. Further, the focus will be on the derivation of verbs and their morphological structure. In the second part of the talk I present how the data in CroDeriV is organized in more detail. I also discuss automatic procedures for morphological analysis and problems faced in this area. This particularly pertains to homography and numerous phonological changes at the morpheme boundaries resulting in several allomorphs for each morpheme. CroDeriV is available for search at: croderiv.ffzg.hr. The database can be searched for various affixes, single roots, combinations of roots and affixes etc. In the final part of the talk I give an outline of further plans for the enlargement and enrichment of CroDeriV.

Ida Raffaelli: *Scientific communication in the Humanities* (course & workshop)

The course and the workshop are targeted to doctoral students in the Humanities who are preparing their first manuscript or would like to improve their skills in writing and publishing in scientific journals. The course will focus on several basic aspects of scientific publishing: 1) what does it mean to communicate scientific research, 2) what could be the differences between various disciplines within the Humanities, 3) aspects of editorial and peer-review process, 4) increase of the interdisciplinary approach within the Humanities, 5) how to make nationally oriented topic internationally relevant. During the workshop students will work on a draft of their manuscripts and will get concrete advises for potential improvements regarding: 1) the structure of the text, 2) the formal requirements and 3) the content of the article.

Predavanje prof. dr. sc. Ide Raffaelli otvoreno je svim sudionicima, a na radionici mogu sudjelovati samo izlagači.

Prijave za slušače otvorene su **do 1. travnja**, a za prijavu je potrebno ispuniti obrazac koji se nalazi na internetskim stranicama Zadarskog lingvističkog foruma (<http://zadarskilingvistickiforum.blogspot.com/>).

Svi sudionici radionice dobit će potvrdu o sudjelovanju na temelju koje će na svojim matičnim ustanovama moći zatražiti dodjeljivanje ECTS bodova.

Kotizaciju o iznosu od 120 kuna (15 eura) potrebno je uplatiti najkasnije **do 1. travnja**. Potvrdu o uplati potrebno je predočiti prilikom registracije sudionika. Na radionici neće biti moguće platiti kotizaciju.

Za uplatu je potrebno koristiti sljedeće podatke:

PRIMATELJ: Sveučilište u Zadru, Mihovila Pavlinovića 1, HR-23000 Zadar, Hrvatska

IBAN: HR53 2330 0031 1001 6324 3

SWIFT (BIC): SOGEHR22XXX

POZIV NA BROJ: 50003

OPIS: ZLF 2015 / ime i prezime sudionika

Sve dodatne informacije o **2. ZADARSKOM LINGVISTIČKOM FORUMU: Metodologija istraživanja i pisanje znanstvenih radova u lingvistici** možete pronaći na internetskoj adresi Zadarskog lingvističkog foruma:

<http://zadarskilingvistickiforum.blogspot.com/>

Veselimo se susretu!

Srdačno i s poštovanjem,

ORGANIZACIJSKI ODBOR:

Mia Batinić, Odjel za lingvistiku, Sveučilište u Zadru – koordinatorica Organizacijskog odbora
Darko Matovac, Croaticum, Filozofski fakultet, Sveučilište u Zagrebu – koordinator Organizacijskog odbora
Marijana Kresić, Odjel za lingvistiku, Sveučilište u Zadru

Maja Kuzmanić, Odjel za francuske i iberoromanske studije, Sveučilište u Zadru
Frane Malenica, Odjel za engleski jezik i književnost, Sveučilište u Zadru
Antonio Oštarić, Sveučilište u Zadru
Lucija Šimičić, Odjel za lingvistiku, Sveučilište u Zadru
